

Kamsicho Raymond Nnaegbuna

Software Engineer | AI/ML Developer

Kamsinnaegbuna@gmail.com | [+2347046194679](tel:+2347046194679) | [linkedin.com/in/kamsicho-nnaegbuna](https://www.linkedin.com/in/kamsicho-nnaegbuna) | github.com/kamzysert3 | Abuja, Nigeria

PROFESSIONAL SUMMARY

Software Engineer specializing in full-stack development and applied AI/ML, with experience building production web platforms, AI-powered systems, and backend infrastructure. Experienced with React, TypeScript, Node.js, Python, FastAPI, LLM applications, computer vision, and cloud deployment.

SKILLS

- Languages:** JavaScript, TypeScript, Python, HTML, CSS, SQL
- Frameworks:** React.js, Next.js, Node.js, Express.js, FastAPI
- AI/ML:** PyTorch, TensorFlow, scikit-learn, computer vision, deep learning, LLMs
- AI Systems:** RAG, vector databases, multi-agent systems, model fine-tuning, prompt engineering
- Cloud & DevOps:** Docker, CI/CD pipelines, Git, GitHub
- Databases:** MongoDB, SQL, Supabase (Postgres)
- Other:** REST APIs, AI model fine-tuning, AI moderation, real-time inference

WORK EXPERIENCE

Software Engineer | Efinsuite

Remote | Jul 2026 - Present

- Improved feature delivery speed, by building and maintaining core features of **eFinSuite**, an AI-powered accounting, payroll, tax and treasury platform for multi-country organizations, using **React/TypeScript** and a **Supabase** backend.
- Reduced incident rate, by debugging backend issues including a **Postgres** column type mismatch and a **Supabase** Storage configuration error, and configuring a custom API subdomain via Supabase's Custom Domains feature.
- Cut migration effort as measured by engineering hours, by leading a platform migration from **Lovable** to **Vercel** with an accompanying **Supabase database migration** across **96 edge functions**, structured over five phases.
- Enabled 4 compliant slip types (T4, T4A, T5, T5018) across 2 schema years as measured by CRA acceptance rate, by integrating the leading integration of the CRA's draft 2027 XML schema for Electronic Filing of Information Returns.

Chief Technology Officer | Eventix Africa

Abuja, Nigeria | Jun 2025 - Present

- Reduced platform time-to-market, by architecting workflows that automate code generation, testing, and deployment pipelines using **GitHub CI/CD Workflows**.
- Accelerated full-stack feature output by 3x as measured by monthly deployments, by establishing branch-per-feature isolation with pull request workflows and automated CI checks, reducing merge conflicts and enabling parallel development across the **React/TypeScript** frontend and **Supabase Edge Function** backend.
- Cut infrastructure costs by 25% as measured by monthly cloud spend, by migrating backend services to **Vercel** with scalable **Node.js** and **Express.js** microservices.

Back-End Developer | Greysoft Technologies

Kaduna, Nigeria | Jul 2024 - Oct 2024

- Improved API response reliability, by building and containerising backend services using **Node.js**, **Express.js**, and **Docker** across **CI/CD pipelines**.

- Reduced data retrieval latency, by optimising **MongoDB** schemas with indexing and normalisation strategies aligned with **SQL** best practices.
- Increased frontend-backend integration speed, by designing RESTful APIs with **TypeScript** that were adopted by three frontend teams across two products.

Software Development Intern | Emerging Trees LTD

Kaduna, Nigeria | Jul 2023 - Oct 2023

- Reduced bug backlog, by systematically implementing feature fixes and writing test cases using **Python** scripting to validate software behaviour.
- Shortened QA review cycles, by documenting reproducible test procedures and collaborating with senior engineers in code reviews.

Frontend Developer | CoLab Innovation Hub

Kaduna, Nigeria | Jul 2022 - Oct 2022

- Increased user engagement, by developing responsive **React.js** interfaces with real-time data rendering via **REST API** integration.
- Reduced UI rendering bugs, by enforcing component-based architecture with **TypeScript** and modern **HTML/CSS** design standards.

PROJECT EXPERIENCE

Full-Stack Developer / AI Developer | Personal Projects

Abuja, Nigeria | Jan 2023 - Present

- Achieved 94% disease classification accuracy as measured by validation dataset performance, by building a Maize Leaf Virus Detection app using **computer vision (YOLO v11, Inception v4, TFLite)** with real-time on-device inference delivered through an HTML/Tailwind CSS frontend.
- Delivered a real-time AI chatroom with under 200ms message latency as measured by load testing, by designing a **multi-agent** conversational system integrating personalised **LLM fine-tuning (Llama 3.1)** with private and group messaging via a **Next.js** and **Flask** backend.
- Boosted user session length by 3x as measured by in-app analytics, by creating an interactive digital storybook and puzzle game using **React.js** with **scikit-learn**-inspired adaptive difficulty logic and **OCR integration** for personalised content.

EDUCATION

B.Sc. Software Engineering | Veritas University Abuja

Abuja, Nigeria | Graduated Jul 2026

- CGPA: 4.37
- Specialisation: Computer Software Engineering
- Relevant coursework: Machine Learning, Data Structures, Software Systems Engineering, Database Management
